Summary

I'm an experienced Full-stack developer with more than 8 years of experience in developing and deploying corporate websites and web services for government bodies and commercial organizations with strong proficiency in the back-end (ASP.NET Core / C#) and front-end (HTML5 / CSS3 / React.js / Redux / Bootstrap) development.

I'm also a rookie and enthusiastic in the field of Mobile application development using Java and Flutter.

Experience

Frontend Developer
Hooshmand Sazan Bin
Jun 2018 - Present (2 years 4 months +)
Bina is trying to build the first fully-featured HIS product in Iran. There are a few HIS solutions based on a prototype with a bunch of limitations. In Bina, we'll do our best to overcome these limitations and provide a best in class product for countrywide usage. Here in Bina, I'm responsible to tune the existing product frontend section with our client's requirements. We're also planning to start the development process of the next version which would be a major upgrade with tons of new features, performance improvements, and a much cleaner and more maintainable codebase.

Full Stack Web Developer
Parnian Group
Oct 2013 - Jun 2018 (4 years 9 months)
Parnian is a private solution provider based on Microsoft's technologies like SharePoint, Exchange, Dynamic CRM and etc. I've been working on several products/projects.

I was a core developer for the Letter Management System which was a part of our Office Automation (LMS, BPMS, DMS) solution. This product consists of three main sections they work together to make the letter-writing process easier using Microsoft Outlook's and OWA's add-in, Microsoft Exchange Server agent for message routing and metadata extraction, and an ASP.NET MVC based portal for Searching Letters, Permission Management, Organization Chart Management and much more... The last version of this product I've been working on comes with built-in multi-tenancy.

Also, I've been developing several SharePoint 2013 solutions consists of WebParts, Migration Tools, Branding Packages and etc using Visual Studio and SOM.

Junior .NET Developer
Farayan
Oct 2012 - Oct 2013 (1 year 1 month)
Farayan was a private small Software development company and I've been working as a junior level .NET Developer in several projects.

Unfortunately, I've heard that the company has been disbanded.

Entry Level .NET Developer
Islamic Azad University
Jan 2012 - Sep 2012 (9 months)
IAU is a private country-wide University and I've been working in the Quchan's branch for several months. I worked there as an entry-level .NET Developer in the IT department.
